

Scripts and Utility Pitch Library

Which script should I use?

SRP homeowner without solar

Use **SRP E-27 Full System** or **SRP E-28 Full System**, depending on the active campaign direction from leadership.

APS homeowner without solar

Use **APS VPP Full System**.

Homeowner already has solar

- **SRP with remaining charges:** Use **SRP Solar Add-On**.
- **APS with remaining charges:** Use **APS Solar Add-On Door Pitch**.

If you are unsure

Use the basic flow below. Collect the facts. Escalate to your trainer or manager before making claims.

Script library

▼ Script 1: SRP Solar Add-On

Best for

Use this for homeowners who already have solar and are still receiving SRP charges or bills.

Rep objective

Identify the remaining bill problem and set an appointment to review battery support.

Intro

1. "Hi, I was looking for the homeowner. Nice to meet you, I'm [Name]."
2. "The reason I'm stopping by is we are doing a quality-of-life check on the solar in the area."
3. "Are you also experiencing any charges or bills from SRP?"

Build pain and explain solution

1. "Did you get the notice from SRP about the changes for solar customers?"
2. "They approved a larger increase for solar customers than for everyone else, which basically penalizes people for creating their own power."
3. "Are you familiar with peak hours?"
4. "They are also changing on-peak hours to 6–9 PM, when the sun is not out. That can increase current SRP bills."
5. "The good news is there is a way for us to help stop that from happening."
6. "We were able to help one of your neighbors who was seeing bills in the \$200–\$300 range before adding a backup battery to power the home at night."
7. "When they installed your solar, did they include a battery?"

8. "In the past, many homeowners were shown solar without a battery option. Now we are not even allowed to service new solar without one. That is how we were able to help your neighbor by setting them up with a battery that reduced their bills from APS or SRP."

If they ask how much the battery costs

"Every system and household is unique, so it varies. I would hate to give you the wrong number. Since you already have solar, we may be able to help you with no out-of-pocket cost."

3 Close appointment

1. "My job is simple. I set up a time for my technician to stop by and see if you qualify. If we cannot save you money on the first day, we cannot enroll you in the program."
2. "He is in the area tomorrow meeting with a neighbor at 3. Does 1 or 5 work better for you?"
3. "Will your spouse also be home?"
4. "Is your credit above 650?"
5. "I'm going to send you a confirmation text in case anything happens or you need to reschedule. What's a good number?"
6. "Before I go, do you get the bill online or in the mail?"
7. "Could you grab that for me?"

4 Commitment check

"Hypothetically, if my technician stopped by and showed you that the program worked exactly like I told you, and you were actually saving money, is there any reason you would not see yourself doing this?"

▼ Script 2: SRP E-27 Full System

Best for

Use this for SRP homeowners when the conversation is focused on the E-27 full-system offer.

Rep objective

Set a qualified technician appointment. Do not try to close the full deal at the door.

1 Confirm homeowner

"Hey, are you Mr./Mrs. [Homeowner Name]?"

2 Build pain and explain solution

1. "I'm just following up on the notice sent out by SRP. Did you get that?"
2. "Basically, it goes over how SRP started new price programs for residential customers back on Nov. 1."
3. "You're most likely on this plan here where they charge you three times for on-peak hours."
4. "Because of this, a lot of the neighbors have been trying to switch to the Customer Generation Plan."
5. "The rate on this new plan is much lower, around 4 cents compared to the 20–30 cents many people pay now."
6. "If you qualify, you would get power at the wholesale rate instead of the retail rate."
7. "That is usually much cheaper."
8. "Have you seen the neighbors with the panels?"
9. "This program is a little different. You are not buying the panels or taking out a large loan or investment."
10. "If you qualify, which only some people do, we may be able to provide the equipment, including a Tesla home storage battery, with no upfront

cost or debt. You would be responsible for paying the lower rate for power."

11. "My job is simple. I set up a time for my technician to stop by and see if you even qualify. If we cannot save you money on the first day, we cannot enroll you in the program."

3 Close appointment

1. "My technician is going to be in the area tomorrow around 3. Does 1 or 5 work better for you?"
2. "Will your spouse also be home?"
3. "Last time you checked, was your FICO score above or below 650?"
4. "I'm going to send you a confirmation text in case anything happens or you need to reschedule. What's a good number?"
5. "Before I go, do you get the bill online or in the mail?"
6. "Could you grab that for me?"

4 Commitment check

"Hypothetically, if my technician stopped by and showed you that the program worked exactly like I told you, and you were actually saving money, is there any reason you would not see yourself doing this?"

⚡ Optional same-day move

"My technician just let me know he is finishing up with his last appointment. He can swing by later today in about an hour. Will your spouse also be home?"

▼ Script 3: APS VPP Full System

Best for

Use this for APS homeowners when the conversation is focused on the Virtual Power Plant program.

Rep objective

Position the battery program at a high level and set a qualified appointment.

1 Confirm homeowner

"Hey, are you Mr./Mrs. [Homeowner Name]?"

2 Build pain and explain solution

1. "Did you get the notice sent out by APS?"
2. "It goes over how APS started the new Virtual Power Plant program for residential customers back on Nov. 1."
3. "APS and Tesla have partnered to add more stability to the Arizona grid because of population growth and heavier power demand."
4. "APS is incentivizing homeowners who install backup storage with a rebate and annual bill credit."
5. "Have you seen the neighbors with the panels?"
6. "This program is different. You are not buying panels or taking out a large loan or investment."
7. "If you qualify, we may be able to provide the equipment, including a Tesla home storage battery, with no upfront cost or debt. You would be responsible for paying the lower rate for power."
8. "My job is simple. I set up a time for my technician to stop by and see if you even qualify. If we cannot save you money on the first day, we cannot enroll you in the program."

3 Close appointment

1. "My technician is going to be in the area tomorrow around 3. Does 1 or 5 work better for you?"
2. "Will your spouse also be home?"
3. "Is your credit above 660?"
4. "I'm going to send you a confirmation text in case anything happens or you need to reschedule. What's a good number?"
5. "Before I go, do you get the bill online or in the mail?"
6. "Could you grab that for me?"

Commitment check

"Hypothetically, if my technician stopped by and showed you that the program worked exactly like I told you, and you were actually saving money, is there any reason you would not see yourself doing this?"

Optional same-day move

"My technician just let me know he is finishing up with his last appointment. He can swing by later today in about an hour. Will your spouse also be home?"

▼ Script 4: APS Solar Add-On Door Pitch

Best for

Use this for homeowners who already have solar and are still seeing APS or SRP charges.

Rep objective

Identify whether the homeowner has a battery gap and book a report review.

1 Intro

"Hi, I was looking for the homeowner. I'm [Name]. We are doing a quality-of-life check on all the solar in the area. Are you also experiencing any charges or bills from APS or SRP?"

2 Build pain

If they say yes, respond calmly:

"In the past, many homeowners were shown solar without a battery option. Now we are not even allowed to service new solar without one. That is how we were able to help your neighbor by setting them up with a battery that reduced their bills from APS or SRP."

If they ask how much the battery costs

"Every system and household is unique, so it varies. I would hate to give you the wrong number. Since you already have solar, we may be able to help you with no out-of-pocket cost."

3 Close appointment

1. "I'll have my engineers build out a report for your system. It will show what is needed and how we can help."
2. "Do you receive APS statements online or by mail?"
3. "Have you seen the usage graph that goes up and down throughout the year?"

4. "We use that to build a report that shows what the system needs in order to take care of the excess usage."
 5. "Let me not assume. Would you be the primary contact?"
 6. Get name, phone number, email, and confirm address.
 7. "After the report is built out, we typically have an engineer swing by for 20–30 minutes. Would [time] or [time] work better for you?"
 8. "Will your spouse also be home?"
 9. "Before I go, I have a couple questions that will save me time. Are you planning on moving in the next 6 months?"
 10. "Is your credit score above 650?"
 11. "Perfect. We will see you at [appointment time]."
-

▼ Script 5: SRP E-28 Full System

Best for

Use this for SRP homeowners when the conversation is focused on E-28 and the SRP Battery Partner Program.

Rep objective

Build the peak-hour problem and set a qualified battery-program appointment.

1 Confirm homeowner

"Hey, are you Mr./Mrs. [Homeowner Name]?"

2 Build pain and explain solution

1. "I'm following up on the notice sent out by SRP. Did you get that?"
2. "It goes over how SRP started new price programs for residential customers back on Nov. 1."
3. "Are you familiar with how peak hours work?"
4. "They are increasing on-peak rates."
5. "Because of this, a lot of your neighbors have been looking into getting approved for the new SRP Battery Partner Program."
6. "SRP and Tesla have partnered to add more stability to the Arizona grid because of population growth and heavier power demand."
7. "If selected and approved, customers may receive incentives or bill credits connected to eligible Powerwall installation."
8. "Have you seen the neighbors with the panels?"
9. "This program is different. You are not buying panels or taking out a large loan or investment."
10. "If you qualify, we may be able to provide the equipment, including a Tesla home storage battery, with no upfront cost or debt. You would be responsible for paying the lower rate for power."

11. "My job is simple. I set up a time for my technician to stop by and see if you qualify. If we cannot save you money on the first day, we cannot enroll you in the program."

Close appointment

1. "My technician is going to be in the area tomorrow around 3. Does 1 or 5 work better for you?"
2. "Will your spouse also be home?"
3. "Last time you checked, was your FICO score above or below 650?"
4. "I'm going to send you a confirmation text in case anything happens or you need to reschedule. What's a good number?"
5. "Before I go, do you get the bill online or in the mail?"
6. "Could you grab that for me?"
7. If they do not have the bill, get high and low bill amounts.

Commitment check

"Hypothetically, if my technician stopped by and showed you that the program worked exactly like I told you, and you were actually saving money, is there any reason you would not see yourself doing this?"

The field flow every script follows

Think of every script as the same conversation with different utility details.

1.  **Confirm the homeowner.** Make sure you are speaking to the right person.
2.  **Create the reason for the stop.** Explain why you are there in one simple sentence.
3.  **Build the problem.** Connect the utility, peak hours, solar charges, or battery need to the homeowner.
4.  **Explain the program at a high level.** Keep it simple. Do not over-explain.
5.  **Set the appointment.** Use two time options.

6.  **Confirm decision makers.** Do not skip spouse or co-owner confirmation.
7.  **Confirm contact info.** Get the correct phone number and email when needed.
8.  **Ask for the bill.** Online, mail, or high/low estimate if they do not have it.
9.  **Ask the qualification questions.** Credit, moving plans, and other required basics.
10.  **Run the commitment check.** Make sure the appointment is real.

 **Memory line:** Homeowner → Reason → Problem → Program → Appointment → Spouse → Contact → Bill → Qualification → Commitment

Non-negotiables

Do not say or do these

- Do not say you work for the utility.
- Do not present yourself as the technician, engineer, closer, or designer.
- Do not promise approval.
- Do not promise exact savings.
- Do not quote exact program terms unless leadership has cleared you to do it.
- Do not argue with objections.
- Do not keep pitching after the appointment is set.
- Do not skip the spouse or decision-maker question.
- Do not skip the bill question.

Safe fallback line

Use this when the homeowner asks for something you are not cleared to explain:

“That is exactly why I want the technician to look at it. I do not want to give you the wrong answer.”

Practice method

1 Learn the structure

Do not start by memorizing every word. First, learn the order.

2 Practice one section at a time

Practice the opener until it sounds natural. Then practice the problem section. Then practice the appointment close.

3 Run the full script without reading

You are ready to roleplay when you can run the script from memory while still sounding normal.

4 Drill objections

Once the basic script is smooth, practice common objections from Module 3.

Quick script cards

Card 1: Confirm homeowner

| "Hey, are you Mr./Mrs. [Homeowner Name]?"

Card 2: Two-option appointment close

| "My technician is going to be in the area tomorrow around 3. Does 1 or 5 work better for you?"

Card 3: Spouse or decision maker

| "Will your spouse also be home?"

Card 4: Bill ask

| "Before I go, do you get the bill online or in the mail?"

Card 5: Commitment check

"Hypothetically, if my technician stopped by and showed you that the program worked exactly like I told you, and you were actually saving money, is there any reason you would not see yourself doing this?"

Shared appointment confirmation

Use this after the appointment time is set:

"That time works. Please make sure you and your spouse are present when they show up. If that time does not work, text me with a better time so I can update the calendar."

Handoff checklist

Before sending the lead forward, confirm:

- ☐  Homeowner name
- ☐  Phone number
- ☐  Email, if collected
- ☐  Full address
- ☐  Utility: SRP or APS
- ☐  Existing solar: yes or no
- ☐  Bill type: online, mail, or high/low estimate
- ☐  Credit question answered
- ☐  Moving plans answered, if required
- ☐  Spouse or decision maker confirmed
- ☐  Appointment time
- ☐  Major objections or concerns noted

Trainer review checklist

A rep is ready to use these scripts when they can:

- ☐ Explain when each script applies.
 - ☐ Run the opener without reading.
 - ☐ Build the problem without sounding robotic.
 - ☐ Ask for the bill naturally.
 - ☐ Use two appointment options.
 - ☐ Confirm spouse or decision maker.
 - ☐ Handle basic resistance without arguing.
 - ☐ Know when to stop and escalate.
-

Final reminder for trainees

The script gives you the path. Your tone earns the conversation.

Keep it simple. Ask one question at a time. Do not over-explain. Once the appointment is set, confirm the details and move on.
